1. See OccupancyMappingProject 运行结果:

2. See OccupancyMappingProject 运行结果:

3. See OccupancyMappingProject 运行结果:

4. 覆盖栅格:不需要整体更新,但地图噪声较多,加入整体更新能有效去噪 计数模型:实现简单,但占用较大的内存保存hits和misses

TSDF: 假设噪声服从高斯分布,利用插值重构曲面使得地图只有一个栅格的厚度,但不适合非高司法分布的噪声,而且计算量较大
